M. Tech. (IIT-Delhi)
Ex. Vice President, Tata
Consultancy Services Ltd. &
Senior Vice President, Adani
Group, Ex. Professor IITM

Problems in present education system

According to metroman engineer Sridharan, only 14% engineers and 21% management graduates possess requisite skills to be employed. According to most professionals, there is a big gap between industry requirements and present education in colleges & institutions. In most of the Universities, whether traditional or technical :-
1. Syllabus is outdated. 2. Outdated technology & subjects are taught, which are not relevant to current industry requirements. 3. Due to lack of practical training in the curricula, students are equipped with theoretical knowledge only.

...and AKS University is committed to change the present scenario
